Elective Classes Course Introduction

Many students have different objectives of learning Japanese, such as to pursue higher education or to find a job. Therefore, we offer a variety of elective classes for students to choose from according to their study objectives.

JLPT course

JLPT (Japanese Language Proficiency Test) is required for those who wish to enter vocational schools or find employment. Teachers will provide guidance.

Art College Preparatory Course

This course is designed for those who wish to study at art universities in Japan. Students can study Japanese at Atys and receive instruction after school at a major art prep school in Utsunomiya City from instructors specializing in art.

Automotive Mechanic Preparation Course

Atys has a partnership with Nissan Technical College Tochigi, a vocational school of Nissan, a major Japanese automobile manufacturer. This course is designed for students who wish to enroll in this vocational school as a career path after graduation.
